Additional comment on KDBH current settlement on page 682.

‘the area is well served in terms of health facilities with 3 GP surgeries and 5 dental surgeries’

My comments are:

It is well recognised to all who live in Knowle that the existing surgeries are inadequate for the existing population based on the fact as evidenced on local community FaceBook sites that it often takes weeks to obtain routine GP appointments. This may be due to the local demographic which has a high proportion of older folk. This proportion is likely to increase with time. What data based work has been undertaken to establish the need for additional GP surgery capacity as a result of the proposed housing developments. The population of Knowle could increase by up to 30%. Equally there is no mention of how many if any of the 5 dental surgeries will accept NHS patients. Will there be an NHS dental service in KDBH for the population increase. Please provide some data and do not leave the issue blank.
