Please return to <u>psp@solihull.gov.uk</u> or Policy and Engagement, Solihull MBC, Solihull, B91 3QB BY Monday 14th December 23:59

Our Privacy Notice can be found at https://www.solihull.gov.uk/About-the-Council/Data-protection-FOI/Solihull-Council-Statement/Economy-and-Infrastructure/Policy-Engagement

This form has two parts –

Part A – Personal Details: need only be completed once.

Part B – Your representation(s). Please fill in a separate sheet for each representation you wish to make.

Part A

1. Personal Details* applicable) *If an agent is appointed, please complete only the Title, Name and Organisation (if applicable) boxes below but complete the full contact details of the agent in 2.

Title	Mr	Mr.
First Name	Jack	Hywel
Last Name	Sharpe	James
Job Title (where relevant)		Principal Planner
Organisation	Kier Living Ltd	Nexus Planning
(where relevant) Address Line 1		5 th Floor
Line 2		Thames Tower
Line 3		Station Road
Line 4		Reading
Post Code		RG1 1LX
Telephone Number		
E-mail Address (where relevant)		

Ref:

Part B – Please use a separate sheet for each representation

Name or Organisation:

3. To which part of the Local Plan does this representation relate?

Paragraph 226	Policy	Policies Map		
4. Do you consider the Loca	al Plan is :			
				N .
4.(1) Legally compliant	Yes		No	Х
(_) _0_ja) 00pa				
4.(2) Sound	Yes		No	
				Х
4 (3) Complies with the				
Duty to co-operate	Yes		No	X
<i>·</i> · ·				Λ

Please tick as appropriate

5. Please give details of why you consider the Local Plan is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Local Plan or its compliance with the duty to co-operate, please also use this box to set out your comments.

Please see the accompanying representations.

(Continue on a separate sheet /expand box if necessary)

6. Please set out the modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters you have identified at 5 above. (Please note that non-compliance with the duty to co-operate is incapable of modification at examination). You will need to say why each modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible.

Please see the accompanying representations.

(Continue on a separate sheet /expand box if necessary)

Please note In your representation you should provide succinctly all the evidence and supporting information necessary to support your representation and your suggested modification(s). You should not assume that you will have a further opportunity to make submissions.

After this stage, further submissions may only be made if invited by the Inspector, based on the matters and issues he or she identifies for examination.

7. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?

No , I do not wish to participate in hearing session(s)	x	Yes, I wish to participate in hearing session(s)
----------------------------------------------------------------	---	--------------------------------------------------------

Please note that while this will provide an initial indication of your wish to participate in hearing session(s), you may be asked at a later point to confirm your request to participate.

8. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary:

Please see the accompanying representations	

Please note the Inspector will determine the most appropriate procedure to adopt to hear those who have indicated that they wish to participate in hearing session(s). You may be asked to confirm your wish to participate when the Inspector has identified the matters and issues for examination.

9. Signature:	Date:	14/12/20

Representations to the Solihull Local Plan Review Regulation 19 Consultation:

Paragraph 226

December 2020

- These representations have been prepared by Nexus Planning on behalf of Kier Living Ltd in response to the Solihull Local Plan Review ("the Emerging Plan") Regulation 19 Consultation in relation to its promotion of land between Chelmsley Lane and Coleshill Road ("the Site").
- 2. The Site is referred to as 'Land at the Rear of 74 108 Coleshill Heath Road' within the Solihull Strategic Housing and Employment Land Availability Assessment 2016 ("SHELAA") (site ref. 193) and is owned by Kier Living. The Site has been promoted through the Call for Sites process (with submissions made in January 2018 and April 2020), through the initial Regulation 18 consultation on a draft of the Emerging Plan in January 2017 and the supplementary Regulation 18 consultation on Site Assessments in March 2019 (previous submissions are included at Appendix 1).
- 3. These representations consider the merits of the Site, as well as some of the housing allocations in the Emerging Plan, having regard to the Council's evidence base.

The Site

- 4. The Draft Submission Document is supported by a suite of evidence based documents including the Strategic Housing and Economic Land Availability Assessment ("SHELAA"), Sustainability Appraisal ("SA") and Green Belt Assessment. The findings of these reports are then combined to inform the Site Assessment document.
- 5. The Site's assessment within each of these documents is summarised below:

<u>SHELAA</u>

6. The Site performs well against all SHELAA criteria, with the only reservation being the achievability constraints. However, Kier Living, a national housebuilder, owns the Site, and delivered the housing development to the immediate west. Kier Living is eager to deliver a residential development of the Site at the earliest opportunity, and there are no restrictive covenants or any other legal issues that would prejudice the viability of a residential development of the Site.

Sustainability Appraisal

- 7. The Site is identified as site ref. 341 for the purposes of the SA. Having regard to the site assessment criteria (Table 2.4 of the main SA Document), it scores well against all relevant SA objectives, notably:
 - SA2: Distance to primary school 418m, only 18m further than would be required for the top bracket;
 - SA3: Proximity to bus service within 400m of a bus service;
 - SA4: Minimising the use of natural resources none of the land is best and most versatile agricultural land;
 - SA7: Flood risk entirely within flood zone 1;
 - SA9: Enhance the connectivity of ecological sites does not contain any wildlife sites;
 - SA10: Protecting valued landscapes landscape with low sensitivity to change;
 - SA11: Enhance quality of areas 240m from greenspace;
 - SA14 Reduce health inequalities and promote healthy lifestyles within 200m of at least two leisure / play facilities.
- 8. The Site Assessment document later concludes that the Site achieves 8 positives (2 of which are significant), 10 neutrals and 1 negative against the SA objectives.

Green Belt Assessment

- 9. The Green Belt Assessment concludes that the Site only contributes towards one of the Green Belt purposes and it therefore makes a negligible contribution towards the purposes of the Green Belt.
- 10.It scores 2/5 against the purpose of preventing the sprawl of urban areas, however the Green Belt Assessment acknowledges that it forms part of the urban area. Furthermore, the Site is bound by built form to the north, south and west, and by a mature hedgerow and treeline to the east. As such, its development would infill a gap within the urban area, and would clearly not cause it to sprawl.
- 11. Notably the Green Belt Assessment concludes that the Site *"does not represent a gap between neighbouring towns"* so scores 0 in relation to preventing neighbouring towns from merging (purpose 2). It is also scores 0 against the purpose of safeguarding the countryside from encroachment, with the assessment stating that it *"is entirely contained by the urban area"*.

12. It also scores 0 against purposes 4 & 5.

Site Assessment document

- 13. The Site Assessment document concludes that the Site performs poorly in Green Belt terms, has a high level of accessibility and is located within an area of medium landscape sensitivity. It was therefore concluded to be suitable for development. The only negative point raised in the conclusion is that its development would narrow the gap between Marston Green and Chelmsley Wood, which is clearly contrary to the conclusions of the Green Belt Assessment that are detailed above. This is clear by the fact that the development of the Site will not extend built form any further east than the recently constructed medical centre to the immediate south of the Site.
- 14. In light of this, there is no robust reasoning (in accordance with the Council's own evidence base) why the Site Assessment document has discounted the Site at Step 2 for the site selection process.

<u>Summary</u>

15. In light of the above, the Council's own evidence base identifies that the Site is deliverable and would be a justifiable housing allocation.

Selected Site Allocations

Evidence Base

16. The Draft Submission Document has allocated a total of 18 sites for residential development, of which 16 are located within the Green Belt. A review of the evidence base conclusions in relation to some of these sites is outlined below:

South of Dog Kennel Lane

- 17. The largest allocation, South of Dog Kennel Lane is expected to deliver up to 1,000 dwellings. This site performs moderately in Green Belt terms, scoring highly in relation to purpose 2 'to prevent neighbouring towns merging into one another'. The Emerging Plan highlights that due to the field structure of the site, it does not have a clear contiguous defensible Green Belt boundary to the south (paragraph 609).
- 18. In addition to the above, the SA concludes that there are several constraints for this allocation including:
 - i. site consists of more than 20ha of best and most versatile agricultural land;
 - ii. up to 50% of the site lies within flood zones 2 or 3,
 - iii. within an area of high landscape sensitivity to change;
 - iv. a heritage asset on site; and

v. sources of noise adjacent to the site that could affect the amenity of future occupiers.

Barratt's Farm, Balsall Common

- 19. This site is allocated to provide up to 875 dwellings. This allocation lies within a moderately performing parcel of the Green Belt with the eastern part falling within a highly performing area of the Green Belt Assessment. The Submission Draft Document states that as this parcel will be cut off from the main part of the land by the line of HS2, thus will reduce the sites contribution to Green Belt purposes.
- 20. In addition to the above, the SA concludes that there are several constraints for this allocation including:
 - i. site consists of more than 20ha of best and most versatile agricultural land;
 - ii. up to 50% of the site lies within flood zones 2 or 3
 - iii. within an area of medium landscape sensitivity to change;
 - iv. a heritage asset on site
 - v. within a mineral safeguarding area;
 - vi. sources of noise adjacent to the site that could affect the amenity of future occupiers; and
 - vii. separated from key economic assets.

South of Knowle (referred to in previous versions of the Emerging Plan, and our corresponding Regulation 18 representations, as 'Arden Triangle')

21. This allocation is expected to provide up to 600 dwellings within the Draft Submission Document. It lies within a lower performing parcel of the Green Belt.

22. The SA states that there are several constraints for this allocation including:

- i. local wildlife site;
- ii. protected trees and other valued landscape features;
- iii. site consists of more than 20ha of best and most versatile agricultural land, and
- iv. impact on the townscape and local distinctiveness due to the site being unscreened and visually prominent.

East of Solihull (referred to in previous versions of the Emerging Plan, and our corresponding Regulation 18 representations, as 'Land at Hampton Lane')

23. This allocation is expected to provide up to 700 dwellings within the Draft Submission Document. It lies within a lower performing parcel of the Green Belt. The Site Assessment document concludes that development on this site would result in an indefensible boundary to the east.

24. In addition to the above, the SA states that there are several constraints including:

i. loss of more than 20 ha of agricultural land;

- ii. proximity to a listed building;
- iii. within a medium landscape sensitivity area with low capacity for change; and
- iv. overlaps a local wildlife site.

Kenilworth Road/Windmill Lane/ Balsall Common

- 25. This allocation is expected to provide 120 dwellings in the Draft Submission Document. It is located within a lower performing parcel in the Green Belt and a mineral safeguarding area. Whilst this site is located within Balsall Common, a settlement identified for significant growth, it is preferable for development to be on land that is more highly accessible. It was concluded within the Site Assessment document that this site has a low level of accessibility.
- 26. It is confirmed in the Submission Document that the site does not perform well in the SA with 4 positive effects and 6 negative with the most significant negative effect being the distance to key economic assets. In addition to this, the Site Assessment document concludes that there are significant ecological and heritage constraints that affect part of the site and will therefore impact any future development.

Pheasant Oak Farm

- 27. This allocation is expected to provide 200 dwellings within the emerging plan period. The western part of the site is located within a lower performing parcel of the Green Belt and the eastern part is within a higher performing area.
- 28. This SA identifies 3 positive and 6 negative effects with a significant effect being the distance to key economic assets and convenience store or supermarket. The negative effects include the site having a low level of accessibility, in an area of medium visual sensitivity with low capacity for change.

Developability

29. Having regard to the above, we consider that there are particular issues with the developability of the following sites:

South of Dog Kennel Lane

- 30. This site is allocated to deliver 1,000 dwellings across the Emerging Plan period.
- 31. The Council's evidence base indicates that this site is heavily constrained, in particular by Flood Zones 2&3, and we therefore have doubts about whether it will be able to deliver its full capacity at an appropriate density having regard to the site's landscape sensitivity.
- 32. The SHELAA indicates that there are numerous land ownerships of this site, which is likely to delay delivery.

Barratt's Farm, Balsall Common

- 33. Barratt's Farm is a Greenfield site within the Green Belt located to the east of Balsall Common and is allocated to provide up to 875 dwellings in the second and third delivery period of the Emerging Plan period.
- 34. The Site Assessment document and SA both reference that some of the site is in Flood Zone 2 or 3, with the SA suggesting that this is up to 50% of the site. Paragraph 155 of the Framework states that inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at highest risk (existing or future). It is stated within the draft document stated that development will be limited to parts of the site outside of flood zone 2 and 3. It is unclear whether this will impact the site's ability to come forward.
- 35. Moreover, the SA identifies that there are three Grade II listed buildings on site and more adjacent to the site. The Draft Submission Document states that the initial Heritage Impact Assessment has identified this harm and recommend mitigation in the form of leaving the fields between the listed buildings and Barratt's Lane and meeting house land undeveloped. It is unclear what this impact will have on the ability for the site to be developed upon as there will be significant impacts on the type and mix of housing able to be developed.
- 36. In light of the above, we have doubts regarding this site's ability to accommodate 875 dwellings.

South of Knowle

- 37. South of Knowle is a predominantly Greenfield site located within the Green Belt and is allocated to provide up to 600 dwellings in the first and second delivery period of the emerging plan period. The development on this site is expected to redevelop the Arden Academy and a new 'all through' school.
- 38. The SA identifies constraints in the form of a local wildlife site on site, protected trees and other valued landscape features including the impact on the townscape and local distinctiveness due to the site being unscreened and visually prominent. The Council have highlighted that these issues will require careful consideration in any future scheme.
- 39. Given its constraints we are unsure whether this site can accommodate the full number of dwellings that it is allocated to deliver at an appropriate density having regards to the site's landscape sensitivity.
- 40. Further, the SHELAA indicates that this site has 9 different landowners, therefore securing agreement between them is likely to delay the delivery of the site. In light of this and the lead-in times outlined in our representations to Paragraph 222 of the Plan, the SHELAA's expectation that this site will deliver 400 dwellings within the first five years of the Emerging Plan period are unrealistic.

East of Solihull

- 41. This site is allocated to deliver 700 dwellings, but is constrained by heritage assets and a local wildlife site.
- 42. The SHELAA indicates that it can deliver 400 dwellings in the first five years of the Emerging Plan period. However, given the lead-in times set out in our separate representations to Paragraph 222 of the Emerging Plan and the numerous landownerships (as indicated by the SHELLA), we consider that this is unrealistic.

Kenilworth Road/Windmill Lane/ Balsall Common

43. This site is allocated to deliver 120 dwellings over the Emerging Plan period. However, the Council's own evidence base identifies that there are a number of constraints to overcome, which raises significant doubts regarding the suitability of this site for housing.

Pheasant Oak Farm, Balsall Common

- 44. Pheasant Oak Farm is located in the Green Belt and is allocated to provide 200 dwellings within the second period of the emerging plan period.
- 45. This site did not perform well in the SA with 3 positive and 6 negative effects identified. The significant negative effects included the distance to key economic assets and convenience store or supermarket. In addition to this, the site has a strong landscape character which consists of features such as hedgerows and significant trees that will need to remain.
- 46. The Site Assessment document references a site selection topic paper which identifies Balsall Common as an area suitable for significant growth. In addition to this it states that development in this area should preferably be on land that is highly accessible and/or performs least well in the Green Belt and/or provides strong defensible boundaries. Within the same document it is stated that the accessibility study rated the site as 'low' overall. Whilst part of the site performs poorly in the Green Belt Assessment, it also has a high performance parcel to the east however development will need to provide a clear, firm green belt boundary. Therefore, this site is assessed to have low accessibility and does not provide a strong defensible boundary which is contrary to the criteria above. As such, we have strong reservations regarding its suitability.

Summary

47. In summary, the Council's own evidence base raises significant issues with a number of the sites that are allocated in the Emerging Plan, and their development would therefore conflict with the Framework. As such, the site selection process is not based on proportionate evidence and the Emerging Plan is consequently not justified as it fails to propose an appropriate strategy.

Deliverability of the Emerging Plan's housing supply

- 48. For the reasons detailed previously in these representations, Kier Living does not consider that all of the sites allocated in the Emerging Plan can accommodate the housing numbers that they are expected to deliver.
- 49. Moreover, a significant portion of the Emerging Plan's housing supply is made up of a small number of large sites. Notwithstanding the site-specific developability issues, there are inherent delivery issues with significant strategic sites which require substantial amounts of infrastructure and often complex landowner agreements, leading to slippage in assumed delivery rates.
- 50. The approach of relying on such a small number of housing allocations to make up a significant portion of the housing supply means that, should one of these sites fail to deliver (or a few of them fall short of the allocated requirement) the Emerging Plan would be unable to meet its minimum housing requirement (see also the points raised regarding housing delivery and requirement set out in our separate representations to Paragraphs 222 and 228).
- 51.In order to address this soundness issue, the Emerging Plan should allocate a wider range of deliverable sites (as advocated at paragraph 68 of the Framework), including the Site, to ensure that, in the event that the significant strategic sites fail to deliver, it can still meet its minimum housing requirement.

Summary

- 52. The Council's own evidence base identifies that the larger allocations within the Emerging Plan have several constraints to overcome which raises questions regarding their deliverability. Furthermore, developments of such strategic scale are also often hindered by substantial infrastructure requirements and landowner conflicts that may can delay housing delivery. Given the inflexibility in the Emerging Plan's housing supply (see our representations to Paragraph 222), this could impact the ability to meet its <u>minimum</u> housing need.
- 53. As such, it cannot currently be concluded that the Emerging Plan is positively prepared, and it is therefore unsound in accordance with paragraph 35 of the Framework.
- 54. The Site has been assessed and found to be deliverable in accordance with the Councils own evidence base. It meets the exceptions to the restriction of development on land designated as open space, as set out at Policy P20 of the adopted local plan. In addition to this, the Site performs poorly in Green Belt terms.

Recommended Changes

55. The following changes are required in order for the Emerging Plan to be found sound:

•

• further housing sites, such as the Site, must be allocated to provide assurances that the <u>minimum</u> housing requirement can be met.

Call for Sites proposals form

Strategic Housing and Economic Land Availability Assessment (SHELAA)

The Council has put out a 'Call for Sites' as part the Local Plan Review.

The submitted sites inform the Council's land availability assessment for housing and economic development uses, or SHELAA, over the plan period. National policy recommends assessing different types of land as part of the same exercise, so that sites may be allocated for the most appropriate use.

The final SHELAA needs to assess not only the suitability of sites put forward, but also the likelihood of them coming forward (are they available and achievable?). However, even if land is identified as having potential in the SHELAA, this does not confirm that it will be allocated for development.

Guidance on submitting information

Please complete the following form as fully as possible to put forward sites that you think Solihull Council should consider for development. This is a fresh 'call for sites', so please resubmit any sites that have been considered in the past.

In completing the form:

- Use a separate form for each site
- Enclose an Ordnance Survey map at scale 1:1250 (or 1:2500 map for larger sites), clearly showing the boundaries of the site
- Submit sites that are likely to become available for development or redevelopment in the next 15-20 years

Council contact details

All completed forms should be sent, either by post or email, to the following address:

Email: psp@solihull.gov.uk

Post: Policy & Spatial Planning Solihull MBC Council House Manor Square Solihull B91 3QB

If you have any further queries please contact Spatial Planning on 0121 704 8000 or email psp@solihull.gov.uk.

Data protection

How we will use your personal information

The information you provide will be used by the Council to help prepare the Strategic Housing and Economic Land Availability Assessment (SHELAA) for the Local Plan Review. Information will be shared with other Council employees or agencies who may be involved with the process. Additionally, your personal details may be shared with other Solihull MBC departments and partner organisations to ensure our records are kept accurate and to keep you informed of future consultation documents. Please note that the Council is obliged to make the site information available as part of the evidence base. The forthcoming Housing & Planning Bill may require the Council to make information about potential sites and ownership available in a public register. Should you have any further queries please contact Policy and Spatial Planning on 0121 704 8000 or email <u>psp@solihull.gov.uk</u>.

5th Floor Thames Tower Station Road Reading RG1 1LX

nexusplanning.co.uk

31st March 2020

Our ref: 32267

Dear Sir / Madam,

Land Availability 'Call for Sites' - Land at the rear of 74 - 108 Coleshill Heath Road

On behalf of our client, Kier Living Ltd, we write in response to Solihull Metropolitan Borough Council's ("SMBC") Call for Sites consultation with respect to land at the rear of 74 - 108 Coleshill Heath Road, Marston Green ("the Site"). A location plan is provided at **Enclosure 1**. The Site measures 1.4ha and is being promoted to deliver 30 dwellings.

The Site and additional land to the south has previously been considered within SMBC's Strategic Housing and Economic Land Availability Assessment 2016 ("SHELAA") as site ref. 193. It was also considered as site ref. 341 within SMBC's Draft Local Plan Supplementary Consultation: Site Assessments document (January 2019) ("Site Assessments document"), where it is referred to as: 'Land between 70 & 84 Chelmsley Road'.

On behalf of Kier Living Ltd, we have submitted representations relating to the Site in response to SMBC's Call for Sites consultation in January 2018, and in response to SMBC's emerging Local Plan Review Regulation 18 consultation in March 2019. We have also met with SMBC planning policy officers in April 2019 to discuss the Site. The previous submissions made on behalf of Kier Living Ltd are included at **Enclosure 2**.

This submission, on behalf of a renowned housebuilder that delivered the adjacent site, demonstrates that the Site is available for residential development comprising 30 dwellings with adequate areas of open space. Kier Living Ltd intend to deliver the Site in full within two years of the adoption of the SMBC Local Plan review.

The previously submitted representations (**Enclosure 2**) demonstrate that the development of the Site for housing would meet the exceptions to restricting the development of sites designated as open space, as outlined within Policy P20 of the adopted Solihull Local Plan (2013), and that the Site makes, at most, a negligible contribution towards the purposes of the Green Belt as set out within the National Planning Policy

SMBC Call for Sites submission (March 2020) continued

Framework ("NPPF"). The previous submissions also identify that the Site is suitable to accommodate a residential development in all other respects.

Following the submission of the abovementioned representations, planning permission was granted for the development of a medical centre to the south of the Site (planning permission ref. PL/2018/02763/PPFL). We outlined the implication of this within a letter addressed to the Maurice Barlow dated 26th April 2019 (**Enclosure 3**); however, in summary, when implemented this planning permission will significantly alter the visual appearance of the Site from Coleshill Road and will set a precedent of built development up to the eastern boundary of the Site which will considerably change the development pattern in the immediate area. The Site now comprises an undeveloped and inaccessible land parcel between existing residential developments to the north and west, a medical centre to the south and a linear park to the east. Its development would therefore comprise a logical rounding off of the development form in the locality.

As such, the reasons for disregarding the Site within the January 2019 Site Assessments document are no longer justified and it should be reappraised as when using SMBC's own assessment methodology, the Site is suitable for residential development.

Kier Living Ltd consider that the delivery of a residential development on the Site, consistent with the Local Plan policy requirements, would be viable and are actively promoting it for residential purposes.

As such, the development of the Site for housing is deliverable in accordance with the definition outlined in the Glossary of the NPPF.

Please don't hesitate to contact me should you have any queries.

Yours sincerely

Hywel James Principal Planner

Enclosure 2: Previously Submitted Representations to the Solihull Local Plan Review

NEXUS

Representations to the Solihull Local Plan Review - Regulation 18 Consultation

March 2019

These representations have been prepared by Nexus Planning on behalf of Kier Living Ltd in response to the Solihull Local Plan Review ("the Emerging Plan") Regulation 18 Consultation. This is the second Regulation 18 consultation held with respect to the Emerging Plan, with a Draft Local Plan (November 2016) subject to consultation between December 2016 and January 2017. The current consultation relates to the Draft Local Plan Supplementary Consultation Document (January 2019) ("Supplementary Consultation Document").

Kier Living own the majority of 'Land at the Rear of 74 - 108 Coleshill Heath Road', as it is referred to within the Solihull Strategic Housing and Employment Land Availability Assessment 2016 ("SHELAA") (site ref. 193). This site has been promoted through the Call for Sites process (with a submission made in January 2018) and through the initial Regulation 18 consultation. The southern portion of the SHELAA site (see land within the blue line on the plan provided at appendix 1) has been sold and a planning application is currently pending for a medical centre (application ref. PL/2018/02763/PPFL) on this land. Kier Living own the remainder of the SHELAA site, which is the subject of these representations (land within the ownership of Kier Living is hereafter referred to as "the Site" and is illustrated in red by the plan at appendix 1).

Background

Overview

The Site, along with land to the south, is designated as a Green Space Site within the Solihull Local Plan (December 2013) and within the Draft Local Plan Review Proposal Map (November 2016) (appendix 2). In addition to the Green Space Site allocation, the Site is also designated as Green Belt. As shown on the Local Plan Proposal Map (November 2011) (appendix 3) the Site was one of two Green Space Site allocations within the Borough, the other, to the east of Hampton-in-Arden, has been removed from the Local Plan Review Proposal Map (2016). In summary, the Site constitutes the only Green Space Site designation in the Emerging Plan.

Green Space

The Green Space Site designation at Chelmsley Lane originates from the 1997 Unitary Development Plan (UDP) (see appendix 4) where it is referred to as Public Open Space, and was designated as open space in conjunction with land safeguarded for residential development immediately adjacent to the west and in association with the nearby hospital redevelopment proposal. This designation was brought forward within the 2006 UDP where the proposals map classifies the Site as open space in association with the adjacent safeguarded land to the west and hospital land to the east (see appendix 5). Its policy justification was to assist in the satisfactory delivery of the appropriate open space requirements associated with the then allocated sites.

However, during the development of the surrounding area, the Site was not secured through respective planning applications and subsequently transferred to private ownership. Its extant and emerging policy status as open space cannot be secured for public access and its amenity value can only therefore be represented as a visual amenity. Further, due to the contained nature of the Site and its boundary delineation comprising established hedge and tree planting, this function is also limited. Its continued protection within an open space policy must therefore be questioned as the Borough Council has no current mechanism to deliver the open space or part of the open space into public control / value unless through agreement with the landowner – Kier Living.

As shown within the 1997 and 2006 UDP, the land immediately to the west of the Site has been allocated for residential development. This is reinforced by the adopted Solihull Local Plan (2013), which allocates the adjacent site for 80 dwellings (Site 9). Planning permission (ref PL/2017/01434/PPFL) was granted in December 2017 for 68 dwellings, notably less than is allocated. The approved development is now almost completed.

Policy P20 of the Solihull Local Plan (2013) relates to open space in Solihull. The policy states that the *"loss of existing facilities through development will not be permitted where they are of value by the local community for recreation, visual amenity, nature conservation or make an important contribution to the quality of the environment or network of green infrastructure, unless:*

- *i.* It can be demonstrated that the open space is clearly surplus to requirements; or
- *ii.* The need or benefit of the development clearly outweighs the loss."

As detailed above, the Site is not relied upon as open space to accommodate surrounding residential development, including the adjoining site that is near completion.

The Site is in private ownership. It is not accessible to the public, and is contained (with no Local Planning Authority ability to restrict further containment through additional landscaping / screening). The ability of the site now or in the future to contribute towards visual amenity is therefore negated. Its loss would therefore not adversely impact the supply of open space in Solihull Borough, and would clearly be outweighed by the benefits of residential development.

Accordingly, the Site meets the exceptions to restricting development of sites designated as open space outlined within Policy P20 of the adopted Solihull Local Plan (2013).

Supplementary Consultation Document Evidence Base

The Supplementary Consultation Document is supported by a suite of evidence base documents. The Site is considered within these documents as follows:

Green Belt Assessment (July 2016)

The Site is considered within the context of a wider land parcel (Parcel RP05). Within this report, each land parcel is assessed against the first four purposes of the Green Belt (as identified at NPPF Paragraph 134). Each parcel is given a score of 0-3, with 0 not considered to be performing against the purposes of the Green Belt and 3 considered to be 'higher performing' against the purposes of the Green Belt. While the report scores the wider land parcels against the purposes of including land within the Green Belt it does not provide justification behind the result, which we have added below.

Purpose 1: To check the unrestricted sprawl of large built up areas

Within the Assessment the Site is scored 2 against purpose 1.

Whilst development of the wider parcel assessed may impact on this purpose, the Site forms a very small area within the overall parcel. Furthermore, it is contained by built development / urban influences on three of its four boundaries. Its development would not compromise the overall Green Belt 'gap' in this location and development of this specific site would not compromise significantly the objective of safeguarding against urban sprawl. Development of the Site will not form a continuous urban form across this entire parcel, but instead would form a clear formal boundary of the Green Belt with the development to the north and south. The majority of the parcel assessed forms the linear park in public ownership secured through the aforementioned planning applications. Notwithstanding our view that the Site per se does not contribute towards 'purpose 1', the precedent of Green Belt erosion in this area means that the development of the Site would not result in the unrestricted sprawl of Marston Green.

Purpose 2: To prevent neighbouring towns merging into one another

Within the Assessment the Site is scored 0 against purpose 2.

As demonstrated through the assessment, the Site does not contribute towards this purpose.

Purpose 3: To assist in safeguarding the countryside from encroachment

Within the Assessment the Site is scored 0 against purpose 3.

As demonstrated through the assessment the Site does not contribute towards this purpose.

Purpose 4: To preserve the setting and special character of the historic towns

Within the Assessment the Site is scored 0 against purpose 4.

As demonstrated through the assessment the Site does not contribute towards this purpose.

Purpose 5: To assist in urban regeneration, by encouraging the recycling of derelict and other urban land

This purpose was not considered as part of the Green Belt review.

Green Belt summary

In summary, the Council's most up-to date evidence base on Green Belt within this location confirms that the land parcel within which the Site is located only contributes towards one of the Green Belt purposes. As set out above, the Site forms a very small part of this assessment area and its scale, specific characteristics in terms of existing urban containment, and impact, if developed, on urban sprawl is very limited. In Green Belt terms the Site, therefore, makes a negligible contribution towards the purposes of the Green Belt.

SHELAA (November 2016)

This document considers the Site as site ref. 193. It concludes that the Site performs well against the suitability and availability criteria, but indicates that there would be some achievability constraints, namely due to reservations regarding delivery in the first five years. To clarify, as detailed below, Kier Living are eager to deliver the Site as soon as possible, and would be capable of doing so within the first five years of the Emerging Plan period; specifically now the adjacent site, allocated in the extant Local Plan, is now nearing completion.

The SHELAA also demonstrates that the Council is relying on the delivery of a number of dwellings between years 1-5 on various large scale allocations (as identified by the Site Assessment (January 2019) evidence base document). The following of which are particularly pertinent:

- Land at Hampton Lane, Solihull 400 dwellings;
- Arden Triangle 400 dwellings.

Sustainability Appraisal: Interim Report (January 2019)

The Site is considered as part of site ref. 341 within the Interim Sustainability Appraisal. The appraisal demonstrates that the Site scores well against the majority of the criteria assessed, with only one mildly-negative score (location of the site within the least deprived 60% of the Borough, therefore its development would only make a minimal contribution towards the reduction of social exclusion and disparities).

Further, the vast majority of sites considered within the Sustainability Appraisal achieve a mildlynegative score against this criterion and score worse against others than site ref. 341, including sites that are proposed to be allocated (e.g. South of Kenilworth Road (SHELAA site ref. 110), which is allocated as part of Arden Triangle).

Site Assessment (January 2019)

Considered as site ref. 341, the Site is concluded to perform poorly in Green Belt terms, has a high level of accessibility, and is located within an area of medium landscape sensitivity. It is therefore concluded to be suitable for development. However, it was not taken forward as an allocation as the Council considered that its development would narrow the gap between Marston Green and Chelmsley Wood (although this conflicts with the conclusions of the Green Belt Assessment and any logical conclusion drawn from detailed site assessment – specifically relating to existing landscape containment).

Deliverability

Against the definition for deliverability provided within the National Planning Policy Framework ("NPPF"), and as set out in greater detail within the three criteria outlined within National Planning Practice Guidance ("PPG") paragraph ref. ID 3-018-20140306 (and detailed further within paragraphs 019 - 021 of the same PPG note), the Site performs as follows:

<u>Suitable</u>

As detailed above, the Site does not currently function as open space and is not relied upon as such by any existing development. Further, the Site meets the exceptions to restricting development of sites designated as Green Space Sites outlined within Policy P20 of the adopted Solihull Local Plan (2013).

It is also evident from above that the Site scores poorly in Green Belt terms in accordance with the Council's own assessment. Further, the Site's eastern boundary provides an opportunity to continue and complete the existing urban pattern here and form a strong and logical Green Belt boundary adjacent to the existing linear park that is in public ownership along the Low Brook corridor.

Subject to the Site's removal from the Green Belt, there are no environmental constraints that would restrict its development. The Interim Sustainability Appraisal and Site Availability demonstrate this, and also conclude that the Site is located in a highly sustainable location for development. The Site's sustainability will be enhanced further should planning permission be granted for the medical centre on land to the south.

The Site has capacity to accommodate up to 50 dwellings with adequate areas of open space in-line with the Solihull Green Space Strategy Review 2014. Access can be obtained through the almost complete Kier Living residential development to the west.

<u>Available</u>

The Site is owned and has been actively promoted by Kier Living, a nationally renowned housebuilder that delivered the adjoining site. There are no ransom strips or covenants that would complicate delivery, and Kier Living intend to deliver the Site themselves.

Achievable

Kier Living, a reputable national housebuilder, owning and promoting the Site demonstrates that the 50 dwellings proposed would deliver a viable development. The viability of the development is emphasised by Kier Living's existing ownership of the Site.

Summary

In light of the above, it is clear that the Site is deliverable in accordance with the relevant paragraphs of the PPG, and would be able to be fully delivered within a five year period. Delivering up to 50 dwellings on the Site will off-set the shortfall of 12 dwellings on the adjoining site against the number allocated within the adopted Solihull Local Plan (2013).

Open space would be provided on-site that would add to the current offer in the locality. Kier Living are also committed to providing a policy compliant affordable housing mix, which would make a valuable contribution to the objective outlined at paragraph 308 of the Supplementary Consultation Document. Further, the Site could be configured so that the built form provides enhanced overlooking of the linear park along the Low Brook.

Need for the Site

Although the Council believes that it has allocated sufficient sites to meet its identified housing need over the Emerging Plan period (plus a small proportion of Birmingham City's unmet needs), we consider that Solihull should accommodate a larger portion of Birmingham City's unmet needs than it is currently providing for and make a more significant contribution to the West Midland Combined Authority's regional housing requirement (identified by the West Midlands Housing Package). Further, we have strong reservations with respect to the deliverability of some of the large-scale strategic allocations within the timescales outlined within the SHELAA housing trajectory. These matters are explored below.

Birmingham City's unmet needs and the West Midlands Housing Package

The Birmingham Development Plan 2031 makes provision for 51,100 additional homes over the plan period (2011-2031), which equates to 2,555 dwellings per annum. This represents a shortfall of 37,900 homes against the objectively assessed needs ("OAN") at the time of producing the plan (89,000 over the 20 year plan period). In accordance with the Government's standard method for calculating housing need, Birmingham City's annual housing requirement is 3,577 dwellings, which over a 20 year plan period equates to a need for 71,540 additional dwellings. Against this requirement, the housing provision within the Birmingham Development Plan results in a shortfall of 20,440 homes. Although the shortfall is less when applying the standard method housing requirement than the OAN at the time of producing the plan, it remains significant.

The Emerging Plan makes a commitment to accommodate 2,000 dwellings from the housing market area (HMA) shortfall (as set out within the Draft Local Plan Review 2016 Consultation Document - paragraph 211).

We acknowledge that the Supplementary Consultation Document (paragraph 51) states that the Council does not wish for views on this to be provided as part of the current consultation. However, the housing need matter is a fundamental part of the plan-making process, and it is essential to have regard to this in considering the proposed allocations.

Table 7 of the Greater Birmingham HMA Strategic Growth Study (February 2018) demonstrates that provision of only 10,130 is being made by authorities within the HMA to accommodate unmet needs (which also include minor shortfalls in Cannock Chase and Tamworth).

Solihull Metropolitan Borough shares a boundary with Birmingham City, and benefits from good public transport and road connections into the city. It is therefore well-situated to help meet the adjoining authority's housing needs. Further, an analysis of 2011 Census Data (Nomis) demonstrates that 887 people (net) migrated from Birmingham City to Solihull Borough between 2001 and 2011. Considering this in a HMA context, Solihull Borough has accommodated 28% of net migration from Birmingham City.

As identified above, Birmingham City's unmet needs are 37,900 (in accordance with the OAN the Birmingham Development Plan is based on) and 20,440 (in accordance with the standard method) homes over its plan period. In light of the above migration statistics, it is reasonable to assert that the Emerging Plan should seek to accommodate 10,612 (OAN) or 5,723 (standard method) of the unmet needs within the HMA (28%). As such, the current provision of 2,000 is disproportionate when considered against migration flows.

Furthermore, the West Midlands Housing Package was agreed with the Government in March 2018. This requires at least 215,000 new homes to be delivered across the region by 2030/31. Proportionately to the standard method requirements within the HMA, Solihull Borough's contribution to this requirement would be 15,050 (7%) by 2030/31 (1,254dpa from a base date of 2018/19).

Therefore, Solihull's actual housing need is more complex than simply applying the standard method figure, and is likely to be significantly higher than the Emerging Plan is currently providing for. Accordingly, additional housing allocations will be required to meet this need.

Delivery of large-scale strategic allocations

Given that we are informed by the Council that the Emerging Plan is reliant on the housing trajectory as set out in the SHELAA (2016), we reserve the right to comment on an updated housing trajectory once made available. Nevertheless, the SHELAA housing trajectory demonstrates that the Council is relying on a number of large-scale strategic allocations to deliver dwellings early in the Emerging Plan period to meet its short term needs. Of particular note are the following draft allocations:

Arden Triangle (Site 9)

Arden Triangle is a greenfield Green Belt site located to the east of Knowle. This site is allocated within the Supplementary Consultation Document to have capacity for 600 dwellings, although the SHELAA considers it to have capacity for 1,162 homes. It comprises a combination of nine separate sites promoted, presumably, by separate landowners/ developers. There is no indication within the

Supplementary Consultation Document or evidence base that the landowners/ developers have agreed to work together or formed a development consortium.

Moreover, the SHELAA Appraisal identifies that 50% of this site is constrained by contaminated land/ landfill site. It is unclear whether this can be remediated in a timely manner to deliver development on this site within the first five years of the Emerging Plan period.

An added complication with this site is the need to either retain or relocate Arden Academy. The Council has produced a Draft Concept Masterplans document for the sites it is seeking to allocate within the Emerging Plan. For Arden Triangle (Site 9) two illustrative concept masterplans have been produced, one demonstrating the school located in its current location, and the other showing the school relocated within this site.

The Supplementary Consultation Document makes reference to the need to decide whether the school will be relocated or not. This is a key issue that will need to be addressed before this allocation is delivered.

As is common practice on allocations of this scale where there are various land ownerships (and particularly in-light of matters relating to the existing school), the Council should include a requirement within any policy relating to this allocation for a site-wide masterplan and/ or development brief to be approved by the Council prior to the submission of any planning application. This will ensure that this site is delivered in a comprehensive manner. Unless there is an agreement in place for all landowners/ developers to work together at an early stage it is highly unlikely that the 400 units being relied upon within the first five years of the Emerging Plan period will be delivered in accordance with the trajectory.

Land at Hampton Lane (Site 16)

Land at Hampton Lane is situated to the east of Solihull within the Green Belt. This site is currently identified to have a capacity of 600 dwellings within the Supplementary Consultation Document, however this may increase depending on the findings of a heritage assessment relating to a Grade II listed building sited within the boundary.

As with the Arden Triangle site, land at Hampton Lane has been formed from five separate sites submitted by, presumably, separate landowners/ developers. Therefore, all landowners/ developers would need to work collaboratively to deliver this site.

In addition to the heritage constraints, this site is subject to significant areas that contain notable wildlife habitats and a number of significant trees.

In-line with our conclusions on the Arden Triangle, we consider that approval of a site-wide masterplan and/ or development brief will be required prior to the submission of any future planning application(s) to ensure that this site is delivered in a comprehensive manner. Unless there is an agreement in place for all landowners/ developers to work together at an early stage it is highly unlikely that the 400 units being relied upon within the first five years of the Emerging Plan period will be delivered in accordance with the trajectory.

Summary

Notwithstanding the above conclusions that the actual housing need for Solihull Borough is likely to be significantly higher than the Emerging Plan is currently providing for, the ambitious trajectories for these two sites mean that there is a high risk that a significant proportion of the identified housing requirements for the first five years of the Emerging Plan will not be met. Accordingly, the Council should seek to identify smaller sites that it is certain can come forward within the first five years of the Emerging Plan period to meet the short-term requirement.

Conclusion

The Site meets the exceptions to the restriction of development on land designated as open space, as set out at Policy P20 of the adopted local plan. It also performs poorly in Green Belt terms, making a negligible contribution towards the purposes of the designation. These representations demonstrate that the Site is deliverable, and is capable of coming forward within the first five years of the Emerging Plan process, if released from the Green Belt.

The Emerging Plan's contribution to meeting Birmingham City's unmet needs is considered to be significantly less than demographic statistics indicate, and it should seek to increase its housing requirement to make a proportionate contribution towards the West Midlands Combined Authority's housing need.

Given the uncertainty regarding the short-term delivery of dwellings on some of the draft large-scale strategic allocations (as are being relied upon by the most up-to-date housing trajectory), the Emerging Plan should seek to allocate more small-scale sites to reduce the reliance of early delivery from large-scale strategic housing allocations to meet the necessary housing requirement, particularly over the first five years of the Emerging Plan period.

In light of the above, the Site should be released from the Green Belt and included as a draft housing allocation within the Emerging Plan.

Attn: Maurice Barlow

Dear Maurice

Additional information to support representation to the Solihull Local Plan Review – Regulation 18 Consultation in relation to Site Ref. 341 Land between 70 & 84 Chelmsley Road.

On behalf of our clients, Kier Living Ltd, we write to submit updated information to support representations to the Solihull Local Plan Review Regulation 18 consultation which ran from the end of January 2019 – 15th March 2019. The representations relate to the site known as Land between 70 & 84 Chelmsley Road, site reference 341 within the Draft Local Plan Supplementary Consultation: Site Assessments ("the Site").

Following the end of the consultation period in March 2019 several elements of the Site have changed which impact upon the representations made and the subsequent assessment of the Site. This letter formally sets out the changes which should be taken into consideration when the representations to the Solihull Local Plan Review Regulation 18 Consultation are considered.

As referenced within our representations submitted during the consultation period, the southern portion of the Site was subject to a planning application (reference: PL/2018/02763/PPFL) for a medical centre. This has subsequently been approved and will result in a two and three storey building fronting Coleshill Road. This planning permission, when implemented, will significantly alter the visual impact of the Site from Coleshill Road; in effect urbanising current glimpsed views of open space.

The granting of permission PL/2018/02763/PPFL sets a precedent of built development up to the eastern boundary of the Site. The Site Assessment (January 2019) identified that the Site was not taken forward for development as the Council considered that the development would narrow the gap between Marston Green and Chelmsley Wood. The granting of permission for the medical centre establishes that development up to the eastern boundary of the Site is acceptable and consequently the dismissal of the Site due to this factor

London	Birmingham	Manchester	Thames Valley

Insert letter title continued

should be disregarded. Furthermore, the development of the medical centre in addition to the Site would establish a clearly defined development boundary that extends to the residential area to the north.

The Site has capacity to accommodate up to 30 dwellings with adequate areas of open space. As previously set out, access to the Site can be obtained through the almost complete Kier Living residential development to the west.

Overall the granting of planning permission PL/2018/02763/PPFL changes the impact of development of the Site and consequently any further assessment of the Site should have regard to this permission.

I trust that this updated information in relation to Site reference 341 Land between Chelmsley Lane and Coleshill Road Marston Green is acceptable. If you require any further information or wish to undertake a site visit please do let me know.

Yours sincerely

Natasha Bullen Planner
